Subject: Hello Little Cigars URGENT

Budi,

How are you and the family. I will be visiting you in October God willing. Budi we have been friends for many years and I need a favor from you. legislation on tobacco IN the USA and the rest of the world are constantly keeping all of us from growing although we just had a big month in July. Your management team and my management have discussed for many months the production of Clove cigars using similar packaging as our present clove cigarettes. Rachman and Boon cooperate with us in every feasible way and they are the greatest. I have no idea why it is taking so long with getting into production so we can start introducing them into the market just in case clove cigarettes are outlawed in the USA . The cigars will look and taste just about the except for the wrapper and therefore will not qualify as a cigarette. Please help me out with this and put in a good word to all the dept heads so that I can get this rolling and cover our future together. This should be done ASAP ANSD SHOULD HAVE BEEN DOINE YESTERDAY.

HUGH
